

While we definitely applaud your efforts to reduce / eliminate Spam of all kinds (FAX, e-mail, etc.), your proposed new regulations regarding FAXes to business partners is much too restrictive and would cause significant hardship on our business and others, and not really accomplish the objectives you seek.

We have approximately 7,000 active customer accounts, buy from over 1700 vendors, and use FAX to communicate with them -- they want these FAXes, but we don't have anything in writing that specifically authorizes us to send them. We would appreciate your consideration to amend the wording of these regulations to allow FAXes within any established business relationships without the need for specific written authorization.

Thanks again for your efforts and consideration.
